NATIONAL AGRICULTURAL LIBRARY
SEP 27 1976
CATALOGING - PREP

EXPLANATION

These listings were compiled in two sections by the Agricultural Stabilization and Conservation Service from the best information available and show the symbols which have been assigned for identification of aerial photography secured by the following Services of the Department of Agriculture as of July 1, 1964. ✓

Agricultural Stabilization and Conservation Service

Forest Service

Soil Conservation Service

The Agricultural Stabilization and Conservation Service has custody of all photography secured by its predecessor agencies (CSS, PMA and AAA) since 1941. Photography flown prior to that time has been transferred to National Archives. Requests for information relative to this coverage should be addressed to: National Archives and Records Service, Cartographic Branch, General Services Administration, Washington D. C. 20408.

With but few exceptions symbols for ASCS photography have been assigned on a county basis. Symbols for FS photography are almost entirely on a project basis. The older coverages secured by SCS were mostly on a project basis and symbols were assigned accordingly. This explains why a single symbol identified photography for several counties. Securing photographic coverages on a project basis makes it possible for a single county to form a part of several separate projects and thus require several symbols to identify complete photographic coverage for that county. Information on photographic coverages, scale, number of photo index sheets, etc., should be secured from the agency having custody of the photography.

The first section of this booklet lists the states and counties in alphabetical order with the symbols assigned to each county shown opposite the name of the county. The symbols are separated into columns headed by the initials of the agency which has custody.

The second section of this booklet lists the symbols in alphabetical order followed by the identity of the Service having custody of the coverage and the names of the states and counties involved.
